You may want to clarify that the definition of “undeveloped” as used in the land use tables is not consistent with the definition provided on p. 9.

I did notice some typos or errors in the numbers in some tables of data from the Census and RPC. For example, the total number of housing units in 1970 and 1990 in table 8-3 should be 730 and 1,950, and the 1980 number for acres in Transport, Com. & Utilities in Table 8-4 should be 7.2.

Identifying properties by owner names, such as on p.36, makes it difficult to understand specifically what locations are being discussed. Even using a plat book for reference may not be helpful over the life of the plan if ownership is transferred. Perhaps you could include a property map identifying the properties you are referencing.

Please use the reverse side of this page for any additional comments.
THANK YOU FOR YOUR INPUT!!
